Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81. No new matter may be introduced in the required drawing.

Applicant is given a TWO MONTH time period to submit a drawing in compliance with 37 CFR 1.81. Extensions of time may be obtained under the provisions of 37 CFR 1.136(a). Failure to timely submit a drawing will result in **ABANDONMENT** of the application.

Claim Objections

Claim 54 is objected to because of the following informalities: In claim 54, line 1 & 2; the term "said highly heat conductive material" was not previously mention. There is insufficient antecedent basis for this limitation in the claim. Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5,35,36,39,40, and 55 are rejected under 35 U.S.C. 103(a) as being unpatentable over Germany Patent Application (DE 4330923 C1) in view of Vandervaart (4,311,192). The said Germany Patent Application discloses a cooling apparatus for

cooling a heat generating component and comprising: a condenser, evaporator, compressor, fans, an expansion/throttle valve, and a sensor. The Germany patent fails to mention a housing containing a motor, a compressor, a fan and said motor controls the fan, compressor and a temperature sensor. VanderVaart teaches a housing consisting of a motor (M2), a fan (F2), sensors (T1-T4) in communication with motor, and a compressor that is also in communication with motor. It would have been obvious to one having ordinary skill in the art at the time of the invention to modify the disclosed invention with a housing containing the said components as taught by VanderVaart for regulating compressor and fan speed based on the temperature provisions.

Allowable Subject Matter

Claims 59-62 are allowed over the prior art of record.

Claims 34,37-53, and 56-58 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melvin Jones whose telephone number is (571)272-4810. The examiner can normally be reached on Monday- Wednesday & Friday.
